GRABPAD™ UNIVERSAL PERMANENT RV JACK PAD

The GrabPad RV jack pad by Lippert delivers a solid foundation for your RV's leveling system. Made with fiberglass-reinforced nylon, it stands up to the weight of big motorhomes and towable rigs while expanding the footprint of each jack foot.

READY FOR ANY CAMPSITE TERRAIN

Terrain-Flex Adaptabilty

Terrain-Flex curved design adapts to uneven ground and slopes up to 5°

Reliable and Permanent

Larger footprint helps stop your jack from sinking in soft ground

Heavy-Duty Construction

Fiberglass-reinforced nylon honeycomb design is lightweight and strong

Designed for a one-time setup, GrabPad uses hardened spring steel clamps for smooth placement, then secures with tightened bolts to lock the pad in position. Once installed, it stays put for every camping trip

Additional Features

- One-time installation saves time at setup and teardown
- Permanent pad stays mounted so you never forget pads at the campsite
- Adjustable steel hard stops keep your jack centered and secure
- Spring steel clamps provide a strong, secure grip and flex for easy installation and slope adaptation
- Protects your jack foot and the surface your RV is parked on
- Universal fit removes sizing guesswork for RV owners
- For 5th wheels, travel trailers, Class A, and Class C motorhomes
- Available in regular size to fit an 8-9" jack foot or large size to fit a 10-12" jack foot
- Fits the Lippert 9" jack foot, the most common jack foot size in the market
- Works on concrete, gravel, grass, and off-grid terrain
- 1-year warranty
- Each pad is rated for 10,000+ lbs.
