THE SCIENCE OF SURVIVAL

ACR Firefly[®] PRO Series

When it comes to saving lives, anything less than the best is not an option. The all new Firefly PRO rescue strobe lights are the brightest and most feature packed strobe lights on the market today. With 3 activation functions, toggle between the ultra-bright strobe or the SOS strobe to visually alert Search and Rescue of your location and toggle to the Steady-On feature for close up recovery operations.

Our innovative wide light emission LED's produce a 360° beam of light (41 Candela) allowing for visibility of over 3.5 miles. Our cool white light has no yellow tinting which allows for a more visible light beam that can be seen at greater distances.

With the all new microprocessor and redesigned electronics, the Firefly PRO will strobe with a single set of AA alkaline batteries for over 56 hours continuously. That is twice as long as our competitors and exceeds USCG and SOLAS Requirements by over 48 Hours.

Available in two models:
Firefly PRO - Manual Activation Only.
Firefly PRO Waterbug - Includes water sensors for automatic activation.

SPECIFICATIONS

	Firefly PRO SOLAS	Firefly PRO Waterbug
ACR Product Number	3970.3 (Carded)/3970.4 (Bulk)	3971.3 (Carded)/3971.4 (Bulk)
