

ALPS MOUNTAINEERING®

ASSEMBLY INSTRUCTIONS - COMPACT STEEL TABLE

1 Remove the table leg assembly and fabric top from carry bag.

2 Set aside the fabric table top and unfold the table frame from center hub.

3 Rotate the cross braces to align with the opposite corner. Interlock the "L" shaped ends into the plastic fixtures.

4 Holding the fabric table top with the logo facing up, place one metal support rail flat in the groove on the plastic corner fixtures. The plastic fixtures should be lined up with the openings in the fabric table top.

5 After the first support rail is in place, extend the fabric table top across to the opposite corners and place the support rail in the plastic fixtures.

6 When both side rails are seated flush into the plastic corner fixtures, the assembly is complete.

Place the table in the desired location.
